

Class User

java.lang.Object
User

```
public class User
extends java.lang.Object
```

-- ISTE 330 Group Project -- Authors: Lowell Pence, Campbell Schweickhardt, Vincent Cheng

Field Summary

Fields	
Modifier and Type	Field and Description
private boolean	<code>hasActiveSession</code>
private java.lang.String	<code>name</code>
private java.lang.String	<code>password</code>
private java.lang.String	<code>username</code>
private java.lang.String	<code>userType</code>

Constructor Summary

Constructors	
Constructor and Description	
<code>User(java.lang.String username, java.lang.String name, java.lang.String userType)</code>	
<code>User(java.lang.String username, java.lang.String password, java.lang.String name, java.lang.String userType)</code>	

Method Summary

All Methods	Instance Methods	Concrete Methods
Modifier and Type		Method and Description
java.lang.String		<code>getName()</code>
java.lang.String		<code>getUsername()</code>
java.lang.String		<code>getUserType()</code>
boolean		<code>isActive()</code>
void		<code>setName(java.lang.String name)</code>
void		<code>setUsername(java.lang.String username)</code>
void		<code>setUserType(java.lang.String userType)</code>
void		<code>toggleActiveSession()</code>

Field Detail

`username`

private java.lang.String username

`password`

private java.lang.String password

`userType`

private java.lang.String userType

name

private java.lang.String name

hasActiveSession

private boolean hasActiveSession

Constructor Detail

User

public User(java.lang.String username,
 java.lang.String password,
 java.lang.String name,
 java.lang.String userType)

User

public User(java.lang.String username,
 java.lang.String name,
 java.lang.String userType)

Method Detail

getUsername

public java.lang.String getUsername()

getName

public java.lang.String getName()

getUserType

public java.lang.String getUserType()

isActive

public boolean isActive()

setUsername

public void setUsername(java.lang.String username)

setName

public void setName(java.lang.String name)

setUserType

public void setUserType(java.lang.String userType)

toggleActiveSession

public void toggleActiveSession()
